

Contents

Preface	vii
Bhattacharya Bibliography	ix
1. Iteration of IID Random Maps on R^+	1
<i>Krishna Athreya</i>	
2. Adaptive Estimation of Directional Trend	15
<i>Rudolf Beran</i>	
3. Simulating Constrained Animal Motion Using Stochastic Differential Equations	35
<i>David Brillinger</i>	
4. θ -expansions and the generalized Gauss map	49
<i>Santanu Chakraborty and B. V. Rao</i>	
5. On Ito's Complex Measure Condition	65
<i>Larry Chen, Scott Dobson, Ronald Guenther, Chris Orum, Mina Ossiander, Enrique Thomann, Edward Waymire</i>	
6. Variational formulas and explicit bounds of Poincaré-type inequalities for one-dimensional processes	81
<i>Mu-Fa Chen</i>	
7. Brownian Motion and the Classical Groups	97
<i>Anthony D'Aristotile, Persi Diaconis and Charles M. Newman</i>	
8. Transition Density of a Reflected Symmetric Stable Lévy Process in an Orthant	117
<i>Amites Dasgupta and S. Ramasubramanian</i>	
9. On Conditional Central Limit Theorems For Stationary Processes	133
<i>Manfred Denker and Mikhail Gordin</i>	
10. Polynomially Harmonizable Processes and finitely polynomially determined Lévy processes	153
<i>A. Goswami and A. Sengupta</i>	
11. Effects of Smoothing on Distribution Approximations	169
<i>Peter Hall and Xiao-Hua Zhou</i>	
12. Survival under uncertainty in an exchange economy	187
<i>Nigar Hashimzade and Mukul Majumdar</i>	

13. Singular Stochastic Control in Optimal Investment and Hedging in the Presence of Transaction Costs	209
<i>Tze Leung Lai and Tiong Wee Lim</i>	
14. Parametric Empirical Bayes Model Selection – Some Theory, Methods and Simulation	229
<i>Nitai Mukhopadhyay and Jayanta Ghosh</i>	
15. A Theorem of Large Deviations for the Equilibrium Prices in Random Exchange Economies	247
<i>Esa Nummelin</i>	
16. Asymptotic estimation theory of change-point problems for time series regression models and its applications	257
<i>Takayuki Shiohama, Masanobu Taniguchi and Madan L. Puri</i>	
17. Fractional Brownian motion as a differentiable generalized Gaussian process	285
<i>Victoria Zinde-Walsh and Peter C.B. Phillips</i>
